

Welcome to the Bee Teaching Trail of the community Pettendorf!

Six stations of concentrated knowledge about the honey and wild bees accompany you for 5.5 km.

In addition to the information boards, insect hotels, wild bee mounds and flower fields, which were created specifically for this nature trail, you can find a small-scale landscape with hedges, orchards, fields and meadows. The popular excursion restaurant "Adlersberg" with its beautiful beer garden and a wide view of Regensburg invite you to linger!

The Bee Trail is part of the "Bee World of Experience Pettendorf". Our community is committed to sustainable development and to improving and securing the nutritional foundations of honeybees and wildlife insects. In addition to the project "Bee World of Experience Pettendorf", the project "Pettendorf Blooms" was initiated by committed citizens and supported with great commitment by the local council and the local government. And now we wish you a lot of fun discovering the "Bee World of Experience Pettendorf".
